

West Sayville Christian School

UNDERSTANDING THROUGH CHRIST

June 15, 2007

To Whom it may Concern,

Ray Lackey gave a presentation on bees for my Kindergarten class last year (2006) that was very informative and entertaining. He brings a see through hive to the classroom so that the children can see the bees at work. Using various props, he explains the different workings of the hive and the jobs of the bees.

Ray is very good with the children. He is able to explain the hive in terms they can understand and answers all questions patiently.

I would highly recommend his classroom presentation to you.

Sincerely,

Deborah Puma
